SUMMARY

Tech lead and senior software engineer with 9 years at Bloomberg, growing from data infrastructure engineer to tech lead of the Bloomberg Law Dockets Platform. Sets technical direction across Bloomberg Industry Group and grows engineers.

EXPERIENCE

Bloomberg L.P.
Sep 2017 – Present
Princeton, NJ

Tech Lead / Senior Software Engineer, Bloomberg Law Dockets Platform
Nov 2022 – Present

- Individual-contributor tech lead for the Dockets Platform (Litigation Solutions), reporting a level above the team and guiding engineers across multiple teams.
- Advised leadership on, and carried out, technical due diligence for the acquisition of a ~70-person company.
- Engineered features for Bloomberg Law's generative AI offering (BLAW AI), bringing AI capabilities to customers.
- Works across Bloomberg Industry Group with engineers in Bloomberg Tax and Bloomberg Government on shared technical direction.
- Reviews system designs from engineers across teams and guides them toward scalable, maintainable solutions.
- Builds proofs of concept for new approaches, then takes them to production or hands them off to delivery teams.
- Leads the Java Guild, an internal engineering community, and gives tech talks that share knowledge and upskill engineers.

Senior Software Engineer, Bloomberg Law Data Infrastructure
Sep 2020 – Nov 2022

- Built and maintained the data infrastructure behind Bloomberg Law.

Software Engineer, Bloomberg Law Data Infrastructure
Sep 2017 – Sep 2020

- Worked across the stack with Java, Python, Spring, Postgres, Oracle, Kafka, and Redis.

EARLY EXPERIENCE

BlackRock
Jun 2016 – Jul 2016

Software Engineering Intern
Built and shipped the next Java/Spring back-end server for the Aladdin Product Group.

Viacom
Jan 2016 – May 2016

Multiplatform Engineering Intern
Led a team of developers building an internal tool to automate configuration file generation.
